

**TURN OFF WATER WHEN BRUSHING TEETH, ETC.**

We sure can waste a lot of water when we're brushing our teeth if we let the water run. Some may remember this song from the old Barney children's show.

There are other places around the house you can practice water conservation, such as when you're washing dishes. And if you have to run the water for a few minutes before it gets hot, try capturing it in a container for watering plants.
